Global Solutions
EEG - EMG - HR/BVP - General Physiology

The Infiniti System is the culmination of 30 years of innovation and leadership in biofeedback and psychophysiology, incorporating the latest advances in electronic hardware and PC software architecture. Its power and versatility enable the system to be customized to any practice and for any budget. From one to forty channels, we offer a system that meets your data acquisition and biofeedback requirements - with the assurance of reliable signal accuracy and infinite flexibility.

Advancing the field of Sport Psychology & Sport Medicine™

Now with TELEMETRY

Thought Technology’s FlexComp Infiniti™, ProComp Infiniti™ and BioGraph Infiniti™ are an essential component of the sports science of AC Milan’s Lab. “... Our ability to monitor muscle fatigue, as well as the psychological and physiological preparedness of our athletes have allowed them to perform at their peak, as well as enabling the team to decrease injuries by 90%.”

Bruno DeMichelis PhD
Milan Lab AC Milan Soccer Team

Medalists Know the Value of Sport Psychology, Physiology and Sport Medicine™

All your needs are met in our monitoring/biofeedback systems, which combine hardware and our BioGraph Infiniti software. Choose from 1 to 40 channels: SEMG, EKG, Skin Conductance, Temperature, HR/BVP, Respiration and Heart Rate Variability, etc. Acquire data in the field using compact flash memory, or monitor and train your client directly to your PC or wirelessly through Tele-Infiniti™ Bluetooth module. Visualization for peak performance coupled with biofeedback, Mind Over Muscle, was pioneered by Thought Technology over 30 years ago.

# DVD ORDER FORM

The following presentations were taped at the 2005 ISNR Conference. ISNR has acquired releases from each presenter and these tapes are copyrighted. Price per keynote and invited speaker DVDs is $25 for ISNR members and $35 for non-members. Workshops are $25 an hour and $35 an hour, respectively. Workshops are three (3) hours in length with the exception of WS-9 which is six (6) hours. Please circle your selection numbers and complete the demographics.

**Note:** The quality is upgraded significantly with the use of the DVDs and graphics direct from the presenter’s power point presentation where available. DVDs will be shipped in approximately ten days.

## KEYNOTE SPEAKERS:

### K-1 KEYNOTE: Breaking the Silence: Brain-Computer-Interfaces in Paralysis  
Niels Birbaumer, PhD

### K-2 KEYNOTE: Overcoming the Barriers to Effective Treatment for ADHD: A Neuro-Educational Approach  
Vincent Monasta, PhD

### K-3 KEYNOTE: Electrophysiological Models of AD/HD Disorder: How Accurate is Our Current Understanding of These Dysfunctions?  
Adam Clarke, PhD

Mario Beauregard, PhD

## INVITED SPEAKERS:

### I-1 INVITED: The Current Status And Future Directions for the Field of Neurofeedback  
Joel Lubart, PhD

### I-2 INVITED: A Physiologically Based Model of Mind/Brain and Consciousness: Implications Based on Timing  
Jay Gunkelman, QEEG-D

### I-3 INVITED: Expectation, Observation and Understanding: Development of a Clinical Model of Neurofeedback  
Susan Othmer, BA

### I-4 INVITED: Principles of Neurotherapy: What Are We Really Trying to Do?  
M. Barry Sturman, PhD

### I-5 INVITED: QEEG Patterns: Subgroups, Profiles, Phenotypes  
Jack Johnstone, PhD

### I-6 INVITED: Billing and Insurance: What You Gotta Know and What You Don’t Want to Do  
Bob Whitehouse, EdD

## WORKSHOPS:

**WS-9:** All You Ever Wanted to Know About Hemoencephalography (6 hours)  
Hershel Toomin, ScD

**WS-10:** Epilepsy, ADD, Paralysis and Psychopathy: New Approaches to Old Problems (3 hours)  
Niels Birbaumer, PhD

**WS-11:** Coherence, Synchrony, and Asymmetry: Principles and Applications 2-Channel Neurofeedback (3 hours)  
Thomas Colliera, PhD

**WS-21:** How it Works: Brain Anatomy and Physiology, Consciousness/Mind/Brain (3 hours)  
Jay Gunkelman, QEEG-D

**WS-23:** Coherence Training and Epilepsy (3 hours)  
Joe Horvat, PhD & Jonathan Walker, MD

**WS-25:** A Guide to the Effective Care of Patients with ADHD: QEEG-Based Assessment and Treatment Strategies (3 hours)  
Vincent Monasta, PhD

**WS-29:** The Clinical Utility of EEG in Treating Children with AD/HD (3 hours)  
Adam Clarke, PhD

**WS-34:** A Guide to the Effective Care of Patients with ADHD: Parent Training, Nutritional Counseling, School Interventions and Social Skills Training (3 hours)  
Vincent Monasta, PhD

**WS-38:** QEEG & LORETA Analysis: Details You Were Afraid to Ask (3 hours)  
Leslie Sherlin, MS & David Myer, Sr., BEE

Harness the Power of Therapeutic Breathing
RESPeRATE® is the only personal therapeutic device indicated by the FDA to lower high blood pressure and reduce stress

“We found that RESPeRATE was very helpful to many of our patients who experience shallow breathing. And patients, some of whom don’t have high blood pressure, say it simply helps them relax. We use it for patients to take home as a means of reinforcing our biofeedback work with them.”

Leonard Schwartzburg, PhD
Clinical Psychologist & Director of the Clinical Institute of Behavioral Medicine, Berkeley, California

RESPeRATE
TO LOWER BLOOD PRESSURE

Professional Dispensing Program available

BrainMaster Technologies, Inc.
Offering: Quality EEG Feedback at an Affordable Price

2 Channel Neurofeedback Monitor

- 256 samples/second with 2.5 software
- 256 Wideband amp training to 64 Hz with 2.5 software
- Compatible with all Windows
- Dual monitors w/Windows 98 and above
- 8 Adjustable frequency bands
- Input impedance: 1,000 G ohms
- User programmable & built-in protocols
- Raw and filtered waveforms
- Statistical summaries and graphs
- Many graphic display modes
- BrainMirror™ spectral display
- Flexible, versatile & easy to use
- For clinical and home trainee use
- Coherence training & display w/phase
- 127 MIDI voices
- Variety of audio feedback
- Percent time over threshold
- Third party software
- Change thresholds & frequency bands on the fly

INTRODUCING NEW 2.5 SOFTWARE!

2.5 Clinical Pro offers clinicians two software packages in one. Clinical training software for the clinic; as well as our new supervised remote training feature. Perfect for home, school or corporate remote training clients when deemed appropriate or necessary. Approximately 100 new enhancements, additional games, improved screens, sounds and dolphin animation are included. 2.5 software empowers the clinician to be in control of session setup and control for all sessions in the clinic and remotely. Many new features including: auttheshresholding, electrode ID’s in protocol, Session Librarian; Peak-to-Peak and RMS scales; MINI-Q option, HEG option, additional Animation options and more!

Invest wisely in your practice
- insist on flexibility, ease of use, and affordability!
