THOUGHT TECHNOLOGY WORKSHOPS

OUTSTANDING INSTRUCTION FOR BETTER UNDERSTANDING

BIOGRAPH INFINITI & DEVELOPER TOOLS

INTRODUCTION TO BIOGRAPH INFINITI 1-DAY WORKSHOP
This 1-day workshop is for researchers and health professionals that want to learn how to use the latest biofeedback technology. The morning session provides an overview of the key features of the BioGraph Infiniti software and hardware. In the afternoon, participants are shown how to use different sensors and multimedia biofeedback screens for physiological indicators including Surface Electromyography (SEMG), Respiration, Temperature, Skin Conductance, Electroencephalography (EEG), Heart Rate and Electrocardiology (EKG). This 1-day course is a basic and general introduction & software instrumentation training only.

DEVELOPER TOOLS LITE 1-DAY WORKSHOP
The Developer Tools Lite workshop is a 1-day hands-on training using BioGraph Infiniti Screen Editors and Scripts. It teaches you how to make quick modifications on-the-fly to screens, and build new screens & scripts.

DEVELOPER TOOLS 2-DAY WORKSHOP
The Developer Tools workshop is a 2-day hands-on training using the BioGraph Infiniti Channel, Screen, and Script Editors. This workshop is targeted at power users of the BioGraph Infiniti environment. Receive an overview on the key concepts behind the Channel, Screen, and Script editors, opening the door to further learning in this exceptionally powerful development environment.

Get Connected With The Best!

ProComp® Infiniti, ProComp 2® and FlexComp® Infiniti provide a combination of features offered by NO other company

- Fiber-optic or optional Bluetooth: ensures secure and fast connections even in noisy environments.
- Active preamplifier sensors – amplifies the signal directly at the skin site to minimize movement artifact and overall noise from long unamplified electrodes – low noise unlike systems using software to zero out the system noise.
- Monitor any combination of sensors including up to 8 EEG's (32 channels with 4 encoders) – not limited to 4 active sensors.
- EEG & Peripherals with ProComp 2: combine 2 EEG's or any ProComp-Infiniti or any two ProComp Infiniti sensors.
- Real EEG impedance testing, not just 60 Hz testing, crucial to assure good signal quality.
- 14 bit resolution (>0.02 [V]) to provide a balance between high resolution and low noise.
- BioGraph Infiniti 3.0: Software: Flexible, yet powerful and includes free developer's tools to allow easy software customization.
- Support for 3rd party developers including BioIntegrator, NeuroCare Pro, EEG Spectrum, MyoRack, Avatar, InVision and others.
- Support for education and research: Thought Technology is a long-standing supporter of AAPB and ISNR, and BFE. Thought Technology and BFE offer numerous workshops (including BCIA certified) and on-line and on-site training and continues to add to its donations of over a half million dollars in product and support to researchers, educators and clinicians.
- 13 full time R&D software Programmers and Engineers committed to providing continued improvement and support of our software and hardware.
- Renowned technical support. Thought Technology employs 4 knowledgeable full-time technical support people, backed up by the product developers, and provides rapid repairs/replacements from North America.
- 50 full-time staff to provide you with the peace of mind that the equipment you use with your clients complies with all regulatory requirements for medical products.

Information for Readers and Contributors

Submission guidelines: Articles should be submitted via email to the Editor (dmoss@uw.edu) as previously unpublished submissions and should conform to American Psychological Association (6th Edition) format, especially the citations and reference list. Articles should be journalistic, telling the story of an application, research topic, or treatment approach. Submissions should be in Microsoft Word or WordPerfect format and double-spaced. Features should be 1,500 to 2,000 words; department articles, 700 words; and letters to the editor, 250 words. Articles should include an abstract of about 80 words and up to 5 keywords. Include degrees, main professional affiliation information, and a digital headshot photo for each author; also, a complete physical and email address for the corresponding author. Keep tables and figures to a minimum (see APA 5 for guidance). Figures should be submitted separately as JPEG, TIF, or EPS files of 200 dpi or greater. Call out all figures and tables in text. Provide a list of captions for all figures after the references; do not embed captions in figures. If using or adapting figures or tables from another source, get permission from the original publisher, and provide complete original citation information. If using a photo of an identifiable person, get a written release with permission to use it in print. The Editor is not responsible for the loss or return of unsolicited articles.

Postmaster and change of address: Send address changes to Biofeedback, PO Box 1897, 810 East 10th Street, Lawrence, KS 66044-8897. AAPB members, send change of address to the Association for Applied Psychophysiology and Biofeedback, 10200 West 44th Ave., No. 304, Wheat Ridge, CO 80033-2840; tel: 303.422.8843; fax: 303.422.8894; email: aapb@resourcecenter.com.

Claims: Claims for missing issues can be honored up to 3 months for US recipients or up to 6 months for subscribers outside the US, single copy prices ($40 for US/$47 for foreign) will be charged for older missing issues. Send claims to Biofeedback, PO Box 1897, 810 East 10th Street, Lawrence, KS 66044-8897; tel: 785.843.1235; fax: 785.843.1274; email: aapb@resourcecenter.com.

AAPB Membership: Biofeedback is a benefit of membership in the Association for Applied Psychophysiology and Biofeedback. For membership information and an online application visit the society’s Web site at www.aapb.org or contact the society at Association for Applied Psychophysiology and Biofeedback, 10200 West 44th Ave., No. 304, Wheat Ridge, CO 80033-2840; tel: 303.422.8843; fax: 303.422.8894; email: aapb@resourcecenter.com.

Reprints: Individual reprints are available from the authors, but quantity orders (more than 100) must be purchased from the printer. For price quotations and delivery information, contact Alliance Communications Group, 810 East 10th Street, Lawrence, KS 66044-8897; tel: 785.843.1235; fax: 785.843.1274.

Copyright: Material printed in Biofeedback is covered by copyright. All rights are reserved. Health Training Seminars

present

BIOFEEDBACK & NEUROFEEDBACK CERTIFICATION PROGRAMS

Our instructors/practitioners are among the most experienced and successful in biofeedback. Many of the professionals we have trained over 34 years are among the most successful biofeedback practitioners in the world. Our unique strategies provide a systematic, guided approach to biofeedback clinical and economic success and meet all BCIA didactic requirements. Health Training Seminars is approved by the APA to offer CE for psychologists and nursing professionals for the program.

We are excited to announce a new series of Biofeedback BCIA Certification seminars featuring two of the most respected educators in the biofeedback field Fred Shaffer, Ph.D., & Erik Peper, Ph.D. These seminars will be offered in various locations for your convenience.

Dates and Locations:
- Philadelphia • August 12-14
- Chicago • November 11-13
- San Francisco • January 13-17
- Fort Lauderdale

Since 1971, Adam Crane and associates have been leaders in the delivery of quality biofeedback training and equipment at low cost.

5 Day General Biofeedback Training:
May 19-22, 2006
July 28-31, 2006
October 20-23, 2006
Tarrytown, New York (30 miles north of NYC)

4 Day EEG Neurofeedback Training:
September 16-20, 2006
December 19-22, 2006

HITS Recent Innovations:
1 Day Mentoring Option provides
10 personal training sessions and
10 case conferences and follows each seminar.

Combine 3 Day “Getting Started” Module A
with AAPB Home Study while saving
50 to 75% and days away from home.

Best Values In Equipment, Low prices, Best Support.
BIOFEEDBACK: Challenging the Boundaries of Technology

38th Annual Meeting
February 15 - 18, 2007
Monterey, California
www.aapb.org
Biofeedback is supposed to relieve stress, not cause it.

Ordering biofeedback products from bio-medical.com is fast, easy, affordable and stress-free.

No sales people to deal with, unless you need them. Find the parts you need by product-type, modality, manufacturer or keyword. We stock our entire web inventory, so there won’t be any long delays for essential supplies or equipment.
