Special Issue: The Psychophysiology of Respiration and the Effects of Breath Training.

Quick and Comfortable EEG Electrodes™

Our new gold-plated cup electrodes and ear clips with DIN connectors are ideal for neurofeedback and clinical EEG applications.

FEATURES:
1. Quality & Durability:
   - Study, gold-plated silver electrodes
   - Extremely flexible and strong tinned wires
   - Much longer lifetime than previous tin electrodes
2. Ease of use:
   - Pre-defined kits, ready for use
   - Color coding system on cables, cups and ear clips provides easy identification and connectivity
3. Flexibility:
   - Interchangeable and replaceable parts save re-order costs

A. Comfort:
   - TT EEG gold cups are the most comfortable and easy to use ear clips on the market, ensuring excellent connection through their gold-plated surfaces

Nexux-10 Wireless Biofeedback System

The Next Generation Biofeedback Solution

NeXus-10 The Nexux-10 is the first of its kind — a truly portable, multi-physiological, wireless biofeedback system that offers clinicians and researchers an unrivaled combination of power, flexibility, and functionality.

BioTrace™ To provide optimum support for the Nexux-10, we’ve paired it with BioTrace™ software that gives clinicians and researchers new dimensions in flexibility and physiological monitoring while expanding biofeedback capabilities. BioTrace™, featuring the most comprehensive, customizable platform on the market, has been designed to work seamlessly with the Nexux-10, creating the most comprehensive system ever designed.
